The mounting struts on the Boeing 747 were designed to match the fittings on the NASA Orbiter that attach it to the central fuel tank for launch.

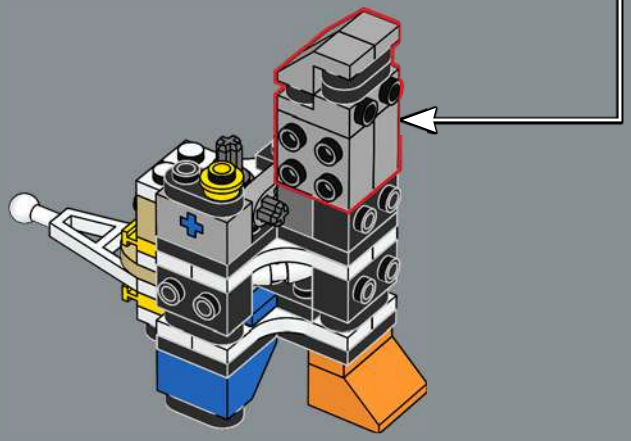

Les mâts du Boeing 747 ont été conçus pour correspondre aux raccords de l'Orbiter de la NASA qui le fixent au réservoir de carburant central pour le lancement.

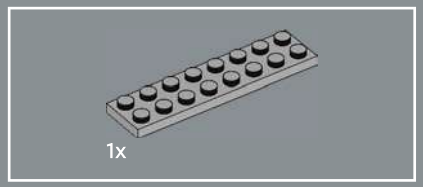

Los soportes de los Boeing 747 estaban diseñados para acoplarse con los conectores que unían el orbitador de la NASA al tanque de combustible central durante el lanzamiento.

The rear mounting points on the SCA were labeled with tongue-in-cheek instructions to 'Attach Orbiter here,' with 'black side down.'

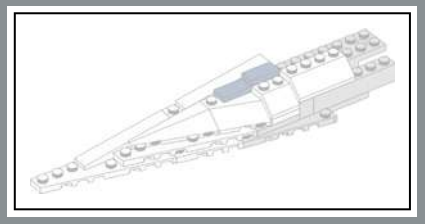

Les points de montage arrière du SCA ont été étiquetés avec des instructions amusantes : « Attachez l'Orbiter ici », avec le « côté noir vers le bas ».

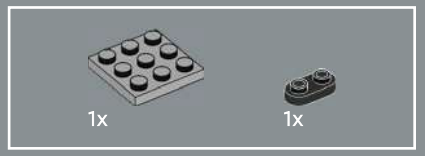

Los soportes posteriores de los SCA tenían etiquetas con la leyenda "ATTACH ORBITER HERE. NOTE: BLACK SIDE DOWN", una irónica indicación de colocar el orbitador con el lado negro hacia abajo.

The orbiters were placed on top of the SCAs by Mate-Demate Devices, large gantry-like structures that hoisted the orbiters off the ground and then mated them with the SCAs.

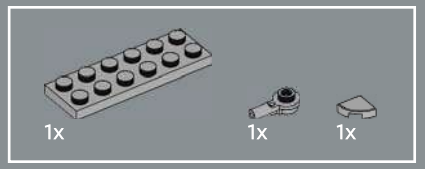

Les orbiteurs ont été placés sur les SCA par des Mate-Demate Devices, de grandes structures ressemblant à des mâts qui ont soulevé les orbiteurs du sol et les ont ensuite accouplés avec les SCA.

Los orbitadores se colocaban sobre los SCA mediante dispositivos Mate-Demate, grandes estructuras con forma de pórtico que los levantaban del suelo para posarlos sobre las aeronaves.

The angled connection of the wings relies on two 'invisible' right triangles with matching hypotenuses. This achieves its 45-degree sweep back as well as the slight upwards angle.

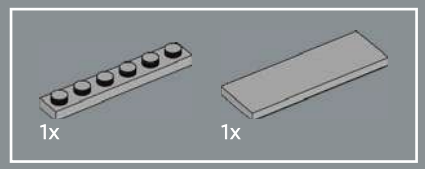

La connexion angulaire des ailes repose sur deux triangles droits « invisibles » aux hypoténuses correspondantes. Cela permet d'obtenir un angle de 45 degrés vers l'arrière ainsi qu'un léger angle vers le haut.

La conexión en ángulo de las alas se hace usando dos triángulos rectángulos "invisibles" con hipotenusas iguales. Es así como se logra que tengan un ángulo de flechado de 45° y un ángulo diedro ligeramente positivo.

The first SCA was retired to Space Center Houston in 2012. It was dismantled into several major pieces and transported in what was called 'The Big Move.'

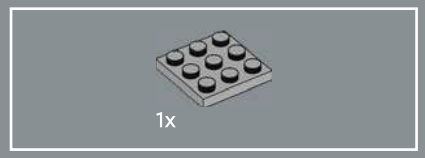

Le premier SCA a été retiré du service au Centre spatial de Houston en 2012. Il a été démonté en plusieurs pièces majeures et transporté dans le cadre de ce que l'on a appelé « The Big Move » (« le grand déménagement »).

El primer SCA se retiró del servicio en 2012 para exhibirlo en el museo Space Center Houston. Fue necesario dividirlo en varias piezas para llevarlo hasta su destino final. Su transporte fue un acontecimiento ampliamente difundido al que los medios llamaron "la gran mudanza".
